

Heuristic Evaluation

Link to git repo: https://github.com/ajibrell/homework_5

Bugs found:

Heuristic: *"Aesthetic and minimalist design"*

Bug #1: Contact page is unnecessary and takes up navigation bar real estate.

Fix: Remove contact page

Heuristic: *"User control/freedom"*

Bug #2: No way for user to return to main menu when on product page

Fix: Add return to menu on product page (see figure 1.1)

Heuristic: *"Match between system and real world."*

Bug #3: For glazing option, it says "description" which can be confusing to users.

Fix: Change "Description" to "Choose glazing"

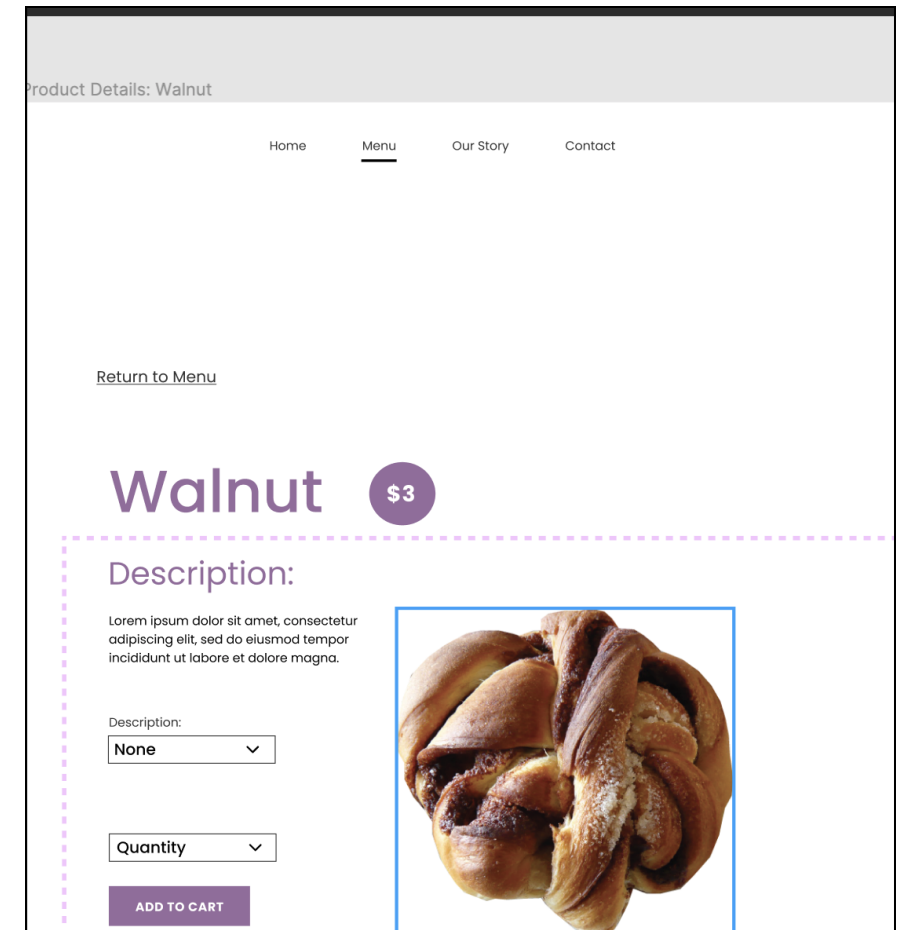

Figure 1.1

Challenges

I spent more time than I'm willing to admit pixel pushing, and doing quick math to ensure the elements appear on the web pages in the right position.

I plan on attending the next office hours to figure out if there is a more efficient way to position elements without having an extremely long CSS page.

Brand Identity

- Offers a clean, minimalist design and makes the product the focus.
- Doesn't overload user with unnecessary information
- Features a fun, and bright palette to capture the essence of a small, mom and pop business.

Bun Bun Bake Shop

Located in the heart of Pittsburgh, Bun Bun Bake Shop offers a wide range of hand-crafted, sweet cinnamon rolls.
